

LATIN for Adults & Teens

For centuries Rome was the leader of the Western world, in military skills, engineering, medicine as well as philosophy art and literature. We are the products of them to many extents. Our language bears the Latin imprint today not only in medicine or law. This Latin course is organized with an hour of language learning and 30 minutes of history and art lecture from the very foundation of Rome (April 21st 753 B.C.) and you will see how a conglomerate of shepherds huts became the largest empire of the West.
